

Simplify and strengthen your cybersecurity with SecureX

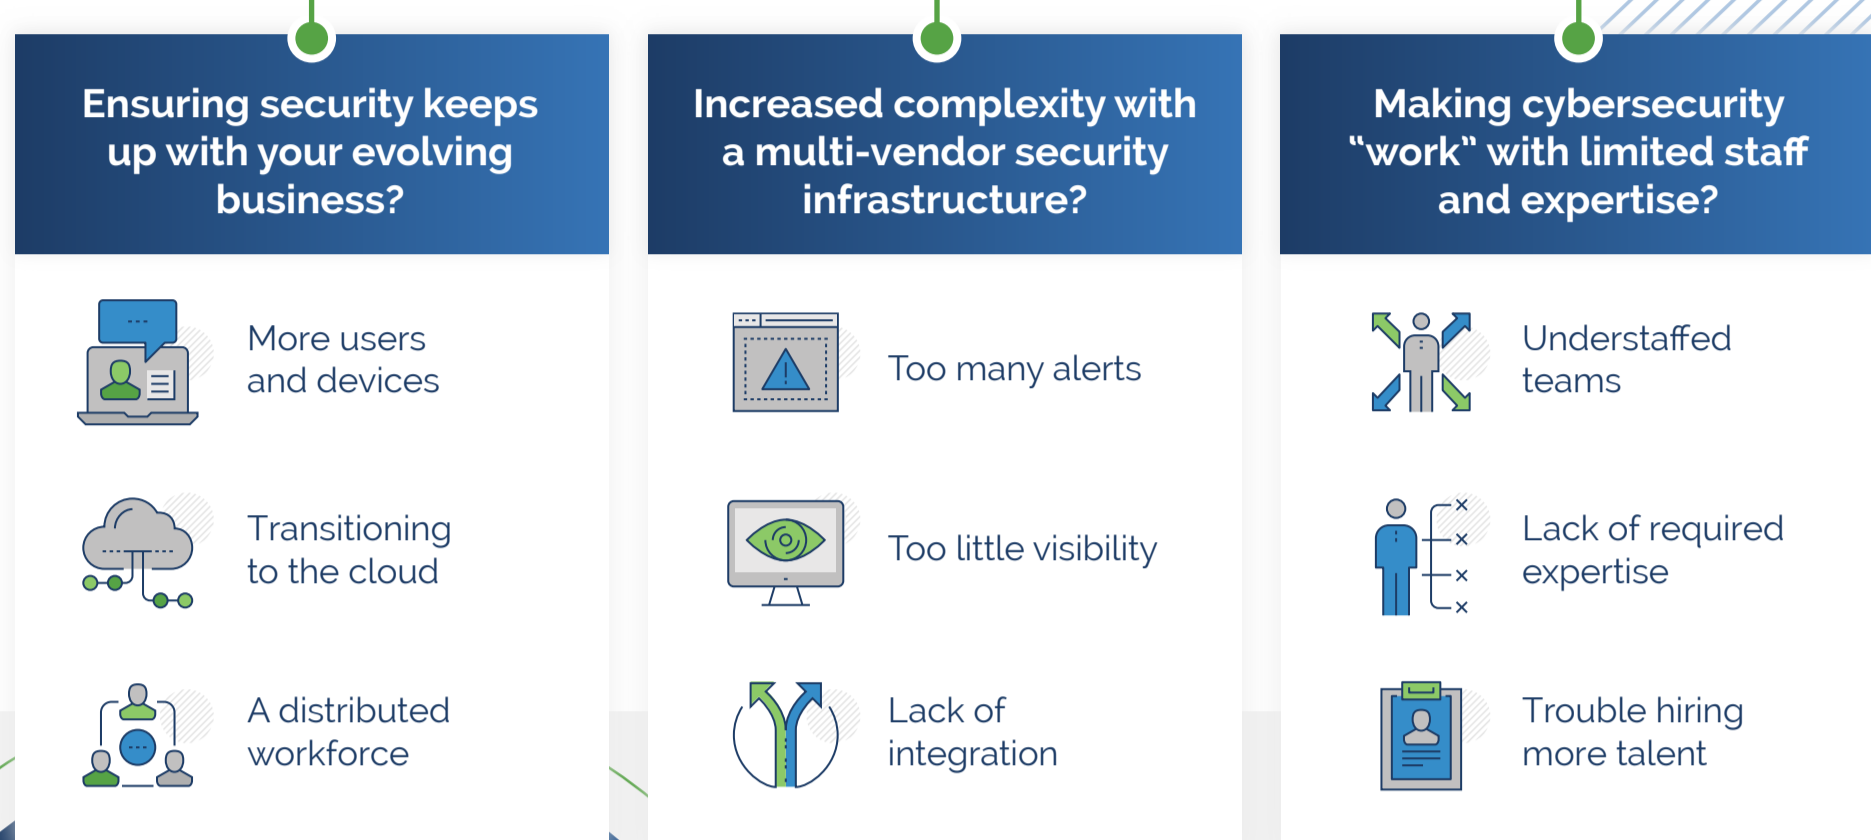

At Internetwork Engineering, we can help you take advantage of Cisco SecureX – a game-changing platform that will not only strengthen your cybersecurity, but also simplify the increased complexity that comes with managing a multi-vendor security infrastructure.

Security has become a grind for many organizations

And when you're stitching together individual products to address changing needs, dealing with continuous complexity, and trying to make it all "work" with limited staff, well... it can feel like that *grind never stops*.

Where do you struggle?

If you're ready to stop the security grind, simplify your experiences, and get past the complexity created by individual security products or controls... Internetwork Engineering can help!

Get to know Cisco SecureX:

A cloud-native platform that delivers a truly simplified cybersecurity experience

SecureX is a cloud-native platform that's built into Cisco's entire security portfolio. In addition to elegantly connecting their products with your infrastructure, SecureX automates workflows and makes it easier to protect everything that's important to your organization – all with no new hardware to deploy.

- Built into every Cisco Secure product
- Integration for everything Cisco plus other 3rd party tools
- Automate workflows to save time and improve efficiency
- Share data and context between SecOps, ITOps, and NetOps

With SecureX, you'll be able to:

<p>Automate routine security tasks using prebuilt workflows, or build your own with a no-to-low code, drag-and-drop canvas.</p>	<p>Accelerate threat investigations and incident management by aggregating global intelligence and local context in one view.</p>
<p>Gain a comprehensive device inventory with contextual awareness that can be used to identify gaps in coverage and simplify investigations.</p>	<p>Improve overall visibility through a customizable dashboard that includes operational metrics, emerging threats, and much more.</p>

Why trust your cybersecurity to IE and Cisco?

Cyberthreats are gaining sophistication at an alarming rate – and together with Cisco, we can help you overcome the mountain of challenges you're facing as you strive to keep your organization protected from them.

INTERNETWORK ENGINEERING

- Security consulting and integration expertise
